

Miami University African Student Network Statement of Purpose

The basic purpose of the African Student Network is to promote African culture and traditions at Miami University Hamilton, at other surrounding colleges and Universities and in the local community. The organization will promote its cause through campus programming and festivals (fashion, music, dance contest, etc.), off-campus field trips, Facebook, and educational lectures from various African speakers.

The organization will document its activities on a created website or on a newly created group space at www.facebook.com. The organization will be open to all African students and non-Africans students.

The establishment of African Student Network on Hamilton Miami Campus will not only give African students a sense of identity, but also create an avenue to share their life experiences with their non-African counterparts. It will also help alleviate some of the misconceptions about African communities.

The goal of the African Student Network is to create an avenue of social networking among the African and non-African students. Engaging in social and educational activities around the African culture will foster a strong and inclusive campus community.
